

STONY PLAIN SUN.

VOLUME ELEVEN

STONY PLAIN, ALBERTA, THURSDAY, JAN. 29, 1931

Whole Number 547

The Basis of Prosperity.

The doctrine that the prosperity and advancement of the whole Dominion rest directly upon conditions in Western Canada, and that, therefore, wise national policies would be directed toward making it possible for the humble settler on the prairie to make a living with a little over, has been preached insistently for many years by this journal to the world at large, and to the effect that the world has been prejudiced and ignorant, says the Winnipeg Free Press.

A dread doubt is now beginning to break in upon a thousand minds hitherto closed, that perhaps there is something after all in the theory that the wealth that keeps Canada going is dug out of the soil of the western prairie, that the vital current which has kept the wheels revolving in ten thousand factories comes from the mighty streams of Western wheat moving to the markets of the world. When this stream slows down the wheels turn more slowly; if it stops they will stop.

A Surprise Party at Comet.

A surprise party which proved to be a very enjoyable affair took place Tuesday at the home of Mr. and Mrs. A. J. Shaul, Comet district. Games, cards and dancing were participated in. The winners at whist were: Ladies' 1st, Mrs. Oscar Michelson; gents' 1st, Mr. Ole Michelson; the consolation prizes went to Mr. and Mrs. John Eylon.

Dancing was kept up till 1 a.m., when all left for their homes, voting that a very pleasant evening had been spent.

What One Farmer Can Do

While a little party was being held at the home of a mutual friend, in Rosenthal district, Friday night, two chaps got into an argument as to the relative carrying power of such, when one of these made a wager he could carry a 150 lb. sack of wheat one mile. The bet was taken at once, and the performance started. The gent who bet he could carry the 150-lb. sack one mile, Mr. Bernard Miller, a Rosenthal resident, won. The measured mile was on the north side of sec. 23, tp. 52, on the Beach road. Mr. Ainschardt was the gent who bet against Bernard, and lost. Ainschardt walked alongside of Barney with a lantern thrown the stunt, and is said to have perspired freely.

The winner is said to have posted a forfeit that he can go the route, carrying 200 lbs. The event is to take place the first moonlight night the road can be kept clear.

R. Gardner New Head of U.F.

Of the resignation of H. W. Wood from the presidency of the U.F. organization and the election of Mr. Gardner, M.P., as his successor, the Edmonton Journal has this to say:

"Mr. Wood has to such an extent typified the organization of which he has been the head so long that it is difficult to think of its carrying on without him. What has been said about the quality of the service he has rendered the U.F. hardly needs to be repeated now. To him the farmers of Alberta are under a great debt, and thru his labors on their behalf the whole province has benefited. On its life he has left an indelible impression.

"It is, after all, not surprising that at the age of 78 Mr. Wood should desire to be relieved of some of the burdens he has assumed. He will remain chairman of Alberta wheat pool. Mr. Gardner, who takes his place as U.F.A. president, has been prominently identified with the association for a lengthy period.

"Apparently it is the intention to have Mr. Gardner combine his new duties with those at Ottawa, where he is the leader of the U.F. group. In succeeding Mr. Wood he will have no doubt that a large measure of confidence that he will meet its requirements is warranted."

Read For Recreation and Profit

If we are to believe what the daily press tells us—and doubtless in the main it gives us all of truth it can find—a certain professor in a United States university has written a book on "The Art Of Rapid Reading." He says that a fast reader—and almost anybody can become one by trying—can get away with 130 books a year, or around twelve a month; and if this swift reader will give but two hours a day to the matter he can read 12,000,000 words a year, which would be around 25,000 words a day. And this, mind you, exclusive of newspaper and magazine reading. Just books, you know. The professor says that any fairly intelligent reader can teach himself to read at least half again as fast as he now does.

I have not seen the professor's book, and if I should come across it, I am not likely to read it. The scope of my ambition does not embrace a desire to be a "rapid" reader. I do not wish to get myself a list of so many books to be travelled through swiftly within a given number of months, or weeks, or days. I can get along nicely without being able to boast of having scanned 12,000,000 odd words in a twelvemonth, and I cannot muster regret at the end of a busy day if I have not done my daily 30,000 words, or ten thousand, or one thousand, or none at all. In fact, I could run quite happily and profitably for a considerable number of days without having seen a printed or written word and without having written one. I could spend the time just thinking over what I had read and deciding how much of it was worth remembering.

Why do we read? More particularly, why do we read books? Doubtless each one would give a different reason for reading, but in a general way, we read for information, for entertainment, for self-improvement, and for pleasure. I like to read in much the same way as I go for a walk. A reasonably rapid pace where the way is open and there is not much in the surroundings to claim special attention; a slower pace when I enter the woods or where the general view is inviting; a pause for some particular view or to listen to the song of a bird or to watch the ever-changing tawdry of the mist in the valley or around the hill tops or to marvel over the growth and height of some forest giant; to throw myself at full length on a bank of moss and just dream. But never in any circumstance to gauge or value the walk by the number of steps I may have taken or the miles I may have travelled.

We walk for recreation—the re-creation, refreshment, uplifting and enlivening of our bodies and minds. When we have the choice we should read for recreation, for profit, for mental and spiritual benefit, for pleasure, for pleasure. We should read as a prospector looks for gold, rapidly, if we wish, where there are no signs of buried treasure, carefully where the "color" shows, and with infinite leisure but keen alertness when we strike a vein or discover a nugget. For it is the nuggets, the gems, buried in the printed pages of books which give soul and zest to reading and the discovery of which repays richly for the time spent.

Not how fast can you read, but how thoroughly, should be the chief rule for any reading that is worth while. Reading which is not worth while is sheer waste of time. Reading for the beauty of style and of thought and of expression, savoring each polished phrase as you would savor the daintiest morsel of food, till you have drawn from it all of its flavor and taste and charm. Your inner ear attuned to catch the music of the words. Your fancy alert to catch the play of fancy of the writer. Pausing now and then to chase to its lair every word you do not understand. That is the way, I take it, to read, when it is your choice to do so, for pleasure and profit.

Don't try to match the mass production of the publishers with mass reading. Better give 12,000,000 seconds to thinking than to rapid scanning of an equal number of words, if you cannot compass both. Don't read so much that you have no time left to think over what you read or have read. Taking the matter by and wide, you will get more profit and pleasure out of slow than out of rapid reading, and you will have time to garner the gems, to listen to the music and to revel in the beauty inherent in all good writing.

You can batter any man by telling Los Angeles stands on the site of him he is battery-proof.

PAIN after eating

What many call "indigestion" is very often nothing but excess acid in the stomach. The stomach nerves have been over-stimulated, and food cannot pass. The corrective is an acid, which neutralizes acid instantly. The best acid known to medical science is Phillips' Milk of Magnesia. It has remained the standard anti-acid with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless liquid will neutralize instantly many times as much acid,

and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this more pleasant way. A small bottle is sufficient to show its merit.

Be sure to get genuine Phillips' Milk of Magnesia prescribed by physicians for more than 50 years in correcting excess acid, like a bottle; any drugstore. Complete directions for its many uses are enclosed with every bottle.

The Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the Phillips' name on bottle.

Device For Astronomers

Enabling Platform Enables Observers To Change Their Position

A piece of machinery to enable readers of the stars to ride has been built by the General Electric Company at its plant in West Lynn, Mass., and is on its way to a Harvard University Observatory in South Africa.

The device is an observer's platform, which revolves in any position, enabling the astronomer following the course of a star to change his position with the rotation of the telescope. It is operated by electric motor, with push button close to the observer's hand.

The platform was designed at the suggestion of Dr. Harlow Shapley, director of the Harvard astronomical observatory. It is to be installed in the Hayden Station of the Harvard observatory at Bloemfontein, South Africa. It will be used with a 60-inch telescope.

Nerves Out of Gear

Need New, Rich Blood To Restore Their Tone

Men and women with nerves out of gear become irritable, fretful and ill-tempered. The fault is not theirs—poor health is the cause. The tired wife or mother whose household duties have worn her out; the breadwinner whose anxiety for his family have worried him until he was ill, are the ones who become run down. Their digestion becomes bad and their nerves ill-fed. The nerves like all bodily organs need healthy red blood and that red blood can best be gained through a course of Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills make rich, red blood; improve digestion; strengthen the tired nerves and bring energy and happiness not only to the sufferer but to those around him. They are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Voice Traced To Wire

Radio Set Left Tuned On Band Following Gunshot

Flying squads, a Black Maria, and foot police were called out when a policeman heard voices in the bar of the Gardeners' Arms, in Nelson Street and High Priory Street, Newcastle, England.

The building was surrounded and a crowd quickly gathered while the police examined the premises. Not a single window had been left open, not a single jemmy mark marked a door.

When the police eventually gained admittance they found that the wireless set had been left on when the premises were closed earlier in the day. The voice the policeman had heard was the voice of Dean Jago broadcasting.

In all infantile complaints that are the result of the depredation of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

Largest Year "Salada" Tea Has Ever Known

Transatlantic Increase In Sales Is Reported For Last Year

At the annual sales conference held at the Royal York Hotel, Toronto, Mr. Arthur M. Wilson, secretary-treasurer of the company, stated that in spite of the fact that the year 1930 was one of depression, generally, the "Salada" tea sales showed a tremendous increase and were the largest the company has ever experienced.

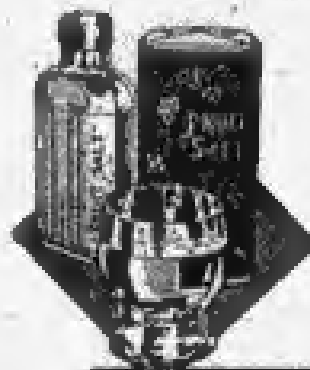

Toothache and neuritis are instantly relieved with Douglas' Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

Experiment Being Watched

Altitude and transport pilots in Chicago await with interest the result of experiments now being conducted by the U.S. Bureau of Standards, which, if successful, will prevent aeroplane collisions. The proposed system involves continuous transmission of ultra-high frequency radio radiations wavebands within a radius of three miles.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a weakened, unbalanced condition.

ENO'S pleasant, gentle, safe and sure.

A daily dose of ENO'S "Fruit Salt" is a glass of water, morning or night, loosens up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

Incident Is Closed

Belgian Courts Reject American Inscription For Rebuilt Louvain Library

The Belgian courts have finally decided that Whitney Warren's inscription, "Destroyed by Teutonic fury; restored by American generosity," may not be restored to the rebuilt Louvain library from which it was torn.

As an epitaph for the architect's rather absurd dream, now happily deceased, we suggest the following: "Brought to be restored by Whitney Warren's fury; destroyed by Belgian common sense."

Report Blames Negligent

It is reported that in California drivers with two or more years' experience are responsible for the greatest number of accidents. The explanation may be that when some motorists become adept they lose their sense of fear and grow so confident that they are prone to take chances that less skilled drivers would avoid. Perhaps a campaign to persuade the experts to be careful is in order.

Canned Soap Factory

New Industry To Be Established At Calgary

Arrangements for the establishment in Calgary of the first canned soap factory in Canada west of Winnipeg, are being completed at the present time, and the new Alberta product will be on the market early in the year. It is announced by Burns & Co., Ltd. investigations have been under way for some time as to the possibility of replacing imported soaps by means of local manufacture—the former, it is said, amounting to \$750,000 annually in Alberta alone.

Could Hardly Live For Asthma, writes one man who after years of suffering has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

The native home of the banana is not known, though it is now raised in every tropical and subtropical country.

Palpitation Of The Heart Nerves Were All Gone

Miss Rose Griffin, Ashern, Man., writes:—"About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone, and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and wish all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The Y. Milburn Co., Ltd., Toronto, Ont.

Four Day Mail Transmission Between Canada and Britain Coming As Aviation Progresses

Four day mail transmission between Great Britain and Canada is seen by post office officials as a reasonable expectation within the next year or so, while the development of aviation may find letters from London being delivered in Vancouver within two and a half days.

Discussing the future of airmail services, P. T. Coulson, deputy postmaster-general, states that during some periods of the year at least the transmission of mail from ship to plane in the Straits of Belle Isle should make it possible to land mail in New York ahead of trans-Atlantic liners entering that port from the British Isles.

While no announcement was made that the department contemplates inauguration of such a service, it was indicated considerable study had been given the project. A successful trial flight was made last fall when letters and newspapers were delivered to Premier R. B. Bennett on board the "Empress of Australia" as the vessel went through the straits. This meant a saving of two days at least in transmission. Decision of the United States government to institute trans-Atlantic air flights via Bermuda and the Azores has led to consideration of possibilities of flights over the North Atlantic, along the Irish coast to Newfoundland is shorter than the single leg between Bermuda and Azores of the proposed United States service. The project in the mid-Atlantic also involves overwater jumps from the coast to Bermuda and from the Azores to Lisbon. Furthermore, it was stated fog conditions along Canada's eastern coastline are probably not worse than those in the neighborhood of Bermuda.

Even with the present cruising speed of airplanes, it is calculated mail from London would reach Belle Isle in 20 hours. This would mean a service of 20 hours to Montreal, 40 hours to Winnipeg, and 50 hours to Vancouver. With aviation companies confidently predicting machines capable of a cruising speed of 140 miles an hour in a year or so, this time would be considerably reduced.

Turning towards Asiatic communication, post office officials visualize the possibility of flights which will take Canadian airmen from northern British Columbia into Japan, touching the United States aviation base at Unadilla in the Aleutian Islands, then following the chain formed by this group and the Kurile Islands into Tokyo.

Paid Taxes in Cabbages

German Farmer Received Last Notice and Had No Money

The market in the Hain town of Heide, Germany, is badly congested because one farmer paid his taxes in cabbages instead of currency.

The farmer had been served with a "last notice to pay," whereupon he wrote to the tax collector that he had not the money, but was willing to pay in kind.

As he didn't receive a refund, he loaded four tons of cabbages early one morning and dumped them in front of the tax office, with a note that he considered the claim settled.

An order is a gentleman whose voice carries further than his opinion.

"I am sorry for you, old fellow."
"Why?"
"I thought my wife & I for next, and she is telling your wife all about it."
—From Humor, Model.

W. H. U. 1974

A New Brain Food

Given in Large Doses Reduces Blood Pressure

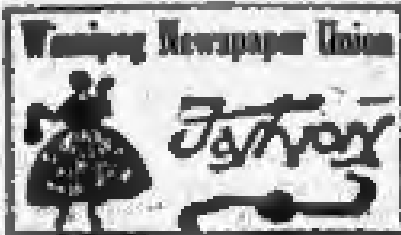

Redhead brains, which look and taste like table salt, is the newest mental food.

This is a surprise in the scientific world because sodium bromide long has been known for its depressive or sedative effects. It was given in small amounts, three to five grains.

But when tried in massive doses of 60 to 100 grains at a time upon several patients at the Utica, N.Y., state hospital, it produced marked improvement.

The psychologists conclude that the bromide's effects on the mentally diseased are associated to a large extent with speeding up of brain functions and to some extent with improved motor co-ordination.

These are group effects, that is, not all individuals were affected in the same manner.

(By Eva A. Tugay.)

LOVELINESS ITSELF!

All Tugay models are created and sketched in Paris and the patterns are made in New York.

Nothing could be more luxuriously lovely than this sleekly shimmering evening dress. It is feminine and graceful to a degree.

It is carried out in transparent velvet of striking indelible blue—has its beaded trim and full-shaped skirt. Most proper evening dress of this type behave in this manner this season. Just as easily could the dress be carried out in lace, a very modish medium—or in almost any very softly falling evening tissue as crepe satin, chiffon, triple georgette or sheer metal lame, etc.

The slim giraffe is of old times and pleated edged. Frills and edges can be pleated edged or finely bound.

This pattern may be obtained in sizes 14 to 20 and 22 to 24. It is ready for immediate delivery. It is laid out.

Send 25 cents (in stamps or cash) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Right Hand for Canada

Optimism Expressed In Address Of Sir John Aldred

Optimism in the future of Canada was the keynote of an address delivered at Toronto before a chartered stenographic reporters' association of Ontario, by Sir John Aldred, president of the Canadian Bank of Commerce.

Every confidence, the Dominion would derive the present economic depression with greater force than ever before, was expressed by Sir John.

With the help of British capital, he proceeded, Canada would excel the United States and ever be free of domination. The speaker also hoped with the readjustment of British war debts and reparations, British capital would once again flow into the Dominion.

"I do not think it is possible Canada could have a serious panic," Sir John declared. "In 1914, the government passed the Finance Act which enabled Canadian banks to borrow as much money from the government as they desired, providing they got security. I think it is one of the best on the statute books."

Canada, in the future, will be the bread basket of the United States, the speaker predicted. The United States has devastated her lands, he declared, while the Dominion has developed a good diversified farming.

Production Of Milk

Milk Production High In Saskatchewan During Month Of December

"Never do I remember the production of so much milk in the month of December of any year as there was recorded in December, 1929," O. W. Anderson, president of the Saskatchewan Co-Operative Creameries, said recently.

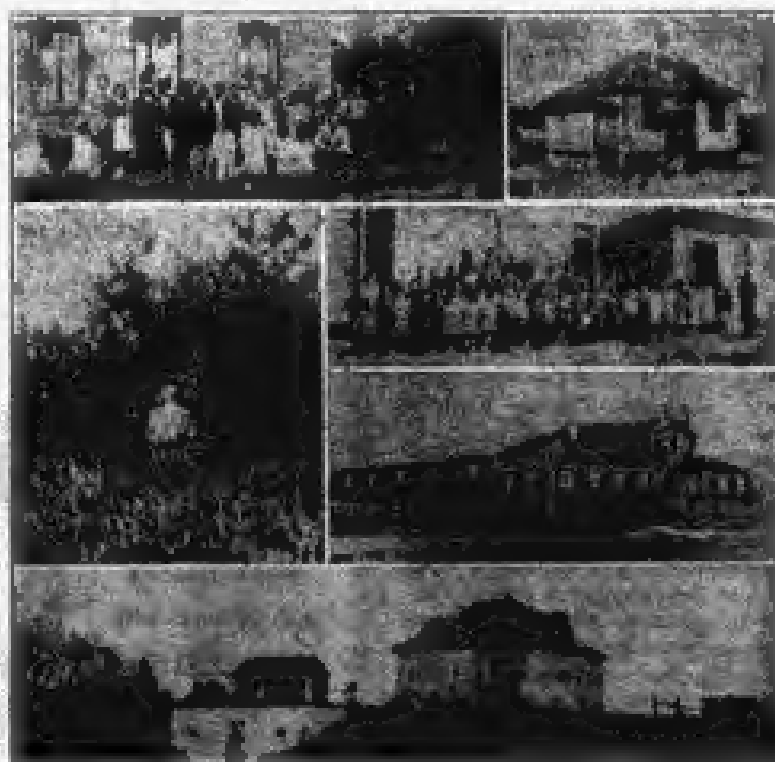

"The increase in production has pretty well settled the butter situation for the first time, since the announcement from New Zealand last fall. The new year is starting out better in the dairy business than the old year did," Mr. Anderson remarked.

Beasts Have New Law

Killing one of your own pigs can be made quite a worthwhile event in the Soviet Union. It might, for instance, be worth two years' imprisonment or exile. Livestock isn't increasing at the rate the government would like, so the powerful Central Executive Committee has placed a ban on killing any livestock capable of reproducing.

Many a man has a kick coming that never reaches him.

Winning Saskatchewan Communities in C.N.R. Program Contests

Announcement of the results of the first year of the Canadian National Railway's community program competitions for Saskatchewan settlements in Saskatchewan shows Blueford, German settlement near Regina, won first place; Laird Memorial community near Saskatoon, second; Beaver Hungarian community near Elkhart, and Cedar Ukrainian settlement near Yorkton, third; and Redberry Ukrainian settlement, near Yorkton, fourth. Pictures above show (left to right): (1) Judges visiting Laird Settlement's home in Regina; (2) Beaver-Hungarian school in Laird district; (3) An orchard scene on the farm of H. K. Frank in Laird district; (4) School at Elkhart; (5) Agricultural Hall in Blueford; (6) Farm home of W. W. Winkler in Blueford.

Hinterland Of Alberta, The Farthest North Part of Canada, To Be Mapped From The Air

In striving to comply with the insistent demand for accurate maps, geographers and mappers are now the aid of the airplane plus photographic equipment. By this means 4,570 square miles in the extreme northeast corner of Alberta, in the same latitude as Leningrad, Russia, has been mapped. In the Exploratory Edition of the Fitzgerald sheet of the National Topographic Series.

The new map, which is on a scale of four miles to the inch, is obtainable upon application to the Surveyor General, Ottawa, for the sum of twenty-five cents in sheet form, or for fifty cents, if on loose leaf or in folder cover.

A portion of Lake Athabasca occupies the northwestern corner. In the far-reaching days this lake was about 75 days canoe travel from Fort William, the old capital of the Northwest Company. Now the aviator-surveysman takes only an hour to make the trip, including time for refueling. By train and steamer seven days are required for this journey.

Slave River, connecting Lake Athabasca and Great Slave Lake, divides the Fitzgerald area into two distinct classes of country. To the west is an almost level plain with few lakes but many sloughs and hay meadows varied by sandy plains, in some cases grass-covered or with growths of young poplar. This is a natural range country. Horses and cattle from Fitzgerald and Fort Smith graze over it all the year round, and come out in the spring in splendid condition.

Here, too, is the last remnant of the wood buffalo. In the past few years blown from Buffalo National Park at Watrous, Alberta, have been brought in and, together with the wood buffalo, are increasing rapidly.

All of the mapped territory east of the Slave River forms part of the great Precambrian shield, displaying rocky ridges and knolls with settled lakes between them. Along the river on this side is a fringe of large spruce with jackpine on the ridges, and spruce, tamarack and birch in the hollows. Here is fair trapping ground into which hunters from Fitzgerald and Fort Smith penetrate.

Lake trout and whitefish are plentiful in contrast to the jackfish and suckers which frequent the waters of the portion west of the Slave River. Lake Athabasca yields quantities of whitefish, which are shipped in ice on scows to Watrous, on the Athabasca River to the south, and there

loaded on express trains for Chicago and other outside points.

On Slave River between Fitzgerald and Fort Smith, a distance of 16 miles, is a stretch of potential water power in a series of rapids with a drop of 134 feet. These are circumvented by a good portage road served by motor trucks. A telegraph line connects the two settlements.

Commenting on the timber along the Slave, Surveyor William Ogilvie, F.R.G.S., of Yukon fame, said that there was abundance of underbrush, alder, willow and birch, including alder more than eight inches in diameter and 80 feet high, while willows were often a foot in diameter. Poplar exceeded 12 to 15 inches in diameter and grew from 100 to 120 feet high. In addition to the lumber obtainable from spruce, there is a supply of timber in this northern region for fences, buildings and fuel.

At Fitzgerald there are trading stores, warehouses, dwellings, a post office and a mission church. Here freight from the steamer is unloaded and re-loaded on trucks for the portage road to Fort Smith. Government administration buildings are located at the latter, with a mission school, church, stores, post office, wireless station and depot of the Royal Canadian Mounted Police. Both Fitzgerald and Fort Smith have a weekly mail from about April to November.

At the Fort the Slave River is about a mile and a half wide. On the west side of the Slave River, opposite La Ronge, about 24 miles in an air-line south of Fitzgerald, outcrops occur of about 10 feet of gypsum, overlaid by 20 feet of broken limestone. Between this and Fitzgerald are several other outcrops of gypsum on islands. The upper beds of these sections are used locally for making lime.

Southwest of Fitzgerald on the Slave River another deposit of 20 feet of gypsum is found overlaid by about 10 feet of detrital limestone. This outcrop extends northwesterward for about 60 miles to the Little Buffalo River on the Peace River map. The top of the outcrop is broken and pitted with sink holes in a way characteristic of a gypsum region.

Washed and rich are the forests of the Fitzgerald country. Added to these are the blossoms of small fruits such as high bush cranberry, cherries, strawberries, wild currants, gooseberries, blackberries and raspberries. Wild fowl, fur-bearing and bigger game people—the Indians, woods and game warden.

Heavy Poultry Shipments

Province Producers Enjoyed Good Trade During the Holiday Season

The Prairie Provinces furnished a large quota of the recent festive season's poultry supplies. Some 177,000 dressed poultry, making a total of 1,750,000 pounds, were shipped over the Canadian Pacific lines between December 2nd and 30th, inclusive. There were 20 carloads from Manitoba, 22 from Saskatchewan, and 16 from Alberta.

Regrowth In Canada

One ton of anytimber yields approximately 200 pounds of oil. In addition the resulting cake or meal has a high value for feeding cattle. This plant is chiefly cultivated in southwestern Ontario, but it is grown in all provinces and its production is increasing.

"You can't imagine how difficult it is to write on paper with a pen."
"That's nothing. For six months I have been writing on the forehead with a pen."—Pope John, Toronto.

U. F. A. OFFERS PLAN TO ASSIST THE PRODUCER

Ottawa, April 11.—Report that Canada's government take over the 1930 wheat crop, paying producers in wheat certificates, was entered at the annual convention of United Farmers of Alberta. The certificates, it was proposed, would be redeemable in wheat and receivable in payment of taxes.

Payment in certificates of a price to producers approximating cost of production, was advised in the resolution advanced by George Herington, of Wintertown, agrarian authority on finance. Actually, explained Mr. Herington, the wheat certificates would be read "trade dollars," not necessarily based for redemption on wheat, but good outside Canada for any commodity produced in the Dominion.

William Irvine, M.P. for Wetaskiwin, associated himself with Mr. Herington in the resolution, which was approved unanimously by the delegates representing more than 18,000 Alberta farmers. Other important resolutions sought an early parity of wheat exporting countries to seek stabilized wheat production and export prices, and a packers' and livestock men's meet to gain an agreement with Britain for regular monthly minimum shipment of livestock and dairy products.

The proposals were contained in a lengthy memorandum from the U.F.A. board of directors, entirely after a full day of debate. The document, as supported by the convention, asked tax and interest reduction, farm relief, credit reform, market extension and tariff revision.

Winnipeg May Have More Representatives

Increase Of Two Seats In Provincial House Contemplated

Winnipeg, Man.—Increase in Winnipeg's representation in the provincial government to 12 seats is contemplated by the Bracken administration. It has been learned in authoritative circles. At present the city has ten seats in the legislature on a basis of proportional representation. The government, it is stated, plans to bring the suburbs of St. James and Kildonan within the city representation, adding two seats.

Building New Roads

United States To Spend \$200,000,000 This Year On Extensive Program

New York.—New roads long enough to circle the globe will be built in the United States by the straining muscle of some 300,000 workmen this year at a cost not far short of a billion dollars.

Upwards of 9,000 miles of the approximate 25,000-mile total will be hard surface. This is exclusive of 11 states in which highway commissioners could make no mileage estimates.

Western Exhibition Officers

Winnipeg, Man.—N. W. Kerr, K.C., Brandon, Man., was elected president of the Western Canada Association of Exhibitions at the closing session of the annual convention here. O. M. Baker, Calgary, was named vice-president, and S. W. Johns, Saskatoon, secretary-treasurer.

Quarantined By Court Martial

Devonport, England.—A naval court martial sentenced Able Seaman Benjamin Tver to six months' hard labor and dishonorable discharge from the service in connection with the short-lived trouble aboard the submarine depot ship "Leda" recently. He was the second enlisted man to be tried. Thirty men were involved.

Report Censor Refuses Post

London, England.—It was reported unofficially that the Earl of Cromer, Herbert Thomas Baring, had been offered and had refused to accept the governor-generalship of Canada. The report was apparently from a reliable source. Lord Cromer has been Lord Chamberlain since 1922.

W. E. W. 1934

No Official Calls In Cuba

Change Necessary In Program For Prince Of Wales

Havana.—The Prince of Wales and Prince George, who are making an 18,000-mile tour of Spanish America in behalf of British trade, will not leave their ship when it reaches Havana, January 31.

The British legation has informed President Machado that because of the shortness of time available here and the court mourning for Pius XII, a change in program had been suggested which would prevent their paying any official calls in Cuba.

Despatches from their ship, the "Orphee," which left Vigo, Spain, yesterday morning, say the princes are enjoying their trip and participating in the ship life with other passengers. The "Orphee's" first stop is at Hamilton, Bermuda.

Hail Insurance Losses Heavier Last Year

Report States Many Companies In Alberta Forced To Withdraw

Toronto, Ont.—Canadian hail insurance losses were heavier last year than in 1929, but not so heavy as in 1927 and 1928. It was stated here by delegates to the Canadian Hail Insurance Companies' convention.

Several losses in Alberta had caused the withdrawal of many companies from Alberta, delegates said, and unless certain legislation sought by the companies was enacted, many more Alberta companies would be forced to withdraw.

ADVERSE VOTE DOES NOT END LABOR PARTY

London, England.—Amid the echoes of age-old religious controversies—struck from behind—its own ranks divided—the MacDonald Government was defeated in the House of Commons by a vote of 202 to 200. As the position of the leaders at the clerk's table told the story of the reverse on a clause of the Education Bill the House was plunged into a commotion with the Conservatives shouting: "Resign, resign."

But although the defeat came in the report stage of the education bill there was no question of a government resignation. Prime Minister Ramsay MacDonald held the vote did not involve a question of principle. The government would, he said, accept the decision of the House and would proceed with the bill.

At this juncture, Rt. Hon. Winston Churchill, who is sometimes termed the Arch-Conservative, arose to proclaim in scornful accents that Mr. MacDonald was "the greatest living master of falling without hurting himself." The government had been defeated by more than 20 votes yet the prime minister, said Mr. Churchill, had simply announced he intended to go ahead as though nothing had happened.

The Conservatives then attempted to press their advantage by moving the adjournment of the House. But here the Laborites who voted against the government on the education clause indicated that, were the adjournment passed, they would again give the government their support. Thereupon the motion to adjourn was dropped and the House proceeded with the bill.

A few hours later, the amended bill was passed by a vote of 204 against 202, and now it goes on to the House of Lords.

The defeat of the government came on an amendment moved by John Burt, Roman Catholic Laborite from Mile End.

The English elementary schools are administered under the dual system of state-owned, or provided schools, and religious, or non-provided schools. The religious schools constitute about two-fifths of the whole and are, in the main, owned by the Church of England. The Roman Catholic schools come next in number.

All the schools are state-supported but in some of the non-provided schools, the buildings and property of a religious community are concerned.

MAY COME TO CANADA

Lord of Chamberlain, who, as Lord Chamberlain, named Mrs. Connelly's play, "The Green Pastures," from English stage, is being persistently mentioned as possible successor to Lord Willingdon as governor-general of Canada.

British Policy In India

People Of India Expected To Judge New Constitution On Merits

Calcutta, India.—Referring to Prime Minister Ramsay MacDonald's statement at the close of the Indian Conference in London, England, the newspaper "Liberty," which represents some sections of the Nationalist Congress, admitted there were passages which revealed the anxiety of the British government to introduce some elements of popular responsibility in the Indian administration.

The newspaper, of which Subhas Chandra Bose, mayor of Calcutta, and president of the Bengal Congress, is a director, said, however, that the people would judge any new constitution by the ordinary test of how far it would ensure responsibility in practice, taking into account the proposed reservations.

Subhas Chandra Bose is at present serving a prison sentence for his activities on behalf of the Nationalists.

World's Poultry Congress

Ottawa, Ont.—Word has just been received here of the appointment of F. C. Elford, Dominion poultry husbandman and past president of the World's Poultry Science Association, as a member of the executive named by the government of Italy to carry out arrangements for the 5th world's poultry congress, which is to be held in Rome in 1935.

No Official Note

Ottawa, Ont.—Rumors in the capital are that parliament will open during the middle week of March. No official announcement, however, has been made.

Quebec.—The British battle cruisers, "Renown" and "Tiger," have been placed under quarantine because of an outbreak of influenza among their crews.

Special Flag May Be Used

Report Says New Government-Designated Will Fly Over Flag

Ottawa, Ont.—While official announcement is lacking, it is rumored here that with the approval of the King the next Governor-General of Canada will fly his own flag, as personal representative of His Majesty. At present the only flag officially recognized in Canada is the Union Jack.

Cape Town, South Africa.—South Africa already flies its own national flag alongside the Union Jack, and now the governor-general is to have his own flag as the personal representative of His Majesty.

The new governor-general is the Earl of Curzon, and his flag will consist of a blue ground on which is the royal crest in gold, with the words "Union of South Africa" above the crest and the same words in Dutch below it.

His Majesty has given approval for the use of the flag.

Canadian Trade Decreased

Unfavorable Balance Shown For Twelve Months Ending December, 1933

Ottawa, Ont.—Canada had an unfavorable balance of trade of \$199,160,124 for the twelve months ending December 31, 1933, according to figures compiled by the Dominion Bureau of Statistics.

There was a falling off in both exports and imports during 1933 as compared with 1932. Imports amounted to \$1,000,478,479, compared with \$1,200,002,002 in 1932. Exports of Canadian goods amounted to \$805,308,355 as compared with \$1,000,412,313 in 1932, and exports of foreign goods to \$19,600,007 compared with \$20,520,117 in 1932.

Russian Wheat Imports

British Government Holding An Investigation On Question

London, England.—The House of Commons witnessed a brief outburst over the question of imports of wheat from Russia.

In reply to a questioner, Rt. Hon. Christopher Addison, minister of agriculture, said the British government was examining the question of importation of wheat from Russia, and its effect on British agriculture. He was unable to say, however, when the British government would issue a statement of the outcome of its inquiry.

Planetoid Approaches Earth

Toronto, Ont.—Eros, a planetoid which comes near the earth approximately every 30 years, is due to make its second appearance, since its discovery in 1898, on the 20th or 21st of this month. Its visit will afford one of the most outstanding opportunities for astronomical research that has occurred since the beginning of the century. Prof. H. R. Kingston, head of the department of mathematics and astronomy, Western University, says.

WHEAT VISIT OTTAWA

Photograph above shows Mrs. John Pearson (left), and her son, Miss Nancy Pearson, well known members of English society, who will pay a visit to Ottawa during present world tour. Attended by their grandmother, Viscountess Cowdray, they recently visited Los Angeles and will include New Orleans and Palm Beach in their tour.

CANADA WHEAT SURPLUS DATA IS REVEALED

Ottawa, Ont.—Wheat surplus in exporting countries of the world are reviewed in a statement issued out by the Dominion Bureau of Statistics recently. Canada's surplus is given at 203,000,000 bushels.

Other important exporting countries have surplus which are estimated as follows: Argentina, 200,000,000 bushels; Australia, 180,000,000 bushels; United States, 201,000,000 bushels. The surplus to Russia is not known, according to the statement, but it has been estimated that 1,157,000,000 bushels have been harvested.

The figures given reflect the situation during the month of December as far as foreign statistics are concerned, while the situation in Canada is covered up to the middle of January.

"Surveying world situation from a Canadian viewpoint, no marked increase in demand is visible," the review states. "European countries, apart from France, will not increase their imports to any great extent. It will be remembered, however, that France has undertaken that between seven and nine million bushels of wheat will be imported during the season. From August 1 to December 31, last, the Canadian exports to France amounted to 2,730,877 bushels.

"Germany's policy with regard to imports of foreign wheat is identical with that of France, the endeavor being to force consumption of rye as bread and as a mixture with wheat. The net result in these two countries is that native wheat is selling at prices from \$1.87 to \$1.87 per bushel, while good North American wheat cannot be imported at the very low price of 85 to 70 cents per bushel."

It is stated in the review that the Argentine surplus will have to be disposed of as soon as possible on account of inadequate storage facilities. At the present time inclement weather in the Argentine is hindering large exports and also deteriorating qualities. Inadequate storage facilities are also the case in Australia which will result in that country selling in the open world market. Australia, however, is also experiencing inclement weather. With respect to Australia, a new outlet has been found in India which is taking large imports from the Antipodes.

With respect to the United States it is stated that that country is not at present a competitor in world markets in spite of large wheat stocks. Russia has forwarded 72,000,000 bushels through Black Sea ports since August 1, but recent export shipments have fallen off. It is forecasted, however, that increased shipments will be forthcoming during the winter.

Non-European countries are expanding their wheat imports, according to the review and continued dry weather in India should mean a better demand for wheat in those countries. The Orient is looked upon as an outlet for Canadian wheat.

The opinion is expressed that with seven months of the crop year remaining, the surplus of 203,000,000 bushels in Canada is not unreasonably high. Attention is drawn to the fact that the five year average export for the seven months ending July 31, was 141,115,524 bushels or 24,192,585 bushels per month. There has been a consistent improvement in the exports of wheat and wheat flour during the first five months of the crop year.

To Protect Dairy Industry

Steps Contemplated To Be Taken With Importation In London, England

London, England.—A royal dairy council with headquarters in London, England, will be formed according to a scheme made by the Royal Dairy Society.

The main objects of the council will be to co-ordinate the interests of the dairy industry throughout the empire, to take steps to protect the home and overseas supply producers from unfair foreign competition and to deal with technical and urgent questions affecting butter and cheese.

On Sunday, Feb. 18th, English Lutheran service at St. Matthew Schoolhouse at 7:30 p.m., by Rev. H. Karing.

Hockey News.

Manager Miller took his Senior Pats to St. Albert Jan. 21 for their scheduled game. The Saints are a pretty good bunch of sports, and intimated they'd be satisfied with a half dozen goals. When the Stongs had let 'em get seven goals they returned home.

The Seniors put up another brave fight to score a goal, in the game with Penn Miners Sunday last, at the local rink. Owing to their untiring energy, splendid team work, and excellent passing, with the kindly assistance of a good goal-tender, the Seniors were able to keep the visitors from scoring more than one goal.

The Seniors play the Flying Frenchmen at Morinville on Sunday next.

Junior Hockey.

Junior hockeyists played their scheduled game at Onaway on the 22d. Owing to the limited transportation facilities of our town, all the good players didn't get up to the northern town; consequently their pick chasers had the better end of the contest right from the start. The Onaway team also had the able assistance of a complete forward line from Gunn Siding, which arrived by motor just before the game. But Onaway did not make a runaway game of it as the Juniors succeeded in scoring 4 goals, put in by John Miller 1, H. Trapp 3. The referee, an Onaway man, seemed to be new to the game, and the consensus of opinion was that, as a hockey referee he'd make a good judge at a yacht race. The Onaway man at Stony's goal seemed to be suffering from some kind of an affliction, as every time the puck would come within ten feet of the goal he'd have both arms up half-mast. Mr. Magwood had his pin-mug broken, someone having struck it with the puck. Onaway plays here tonight, and it is hoped all Juniors will be able to be present.

Here and There

(657)

Approximately 25,000 people living in Canada are shareholders in the Canadian Pacific Railway, their number having been increased by over ten thousand during the past year. Many of these are employees of the company, while a large percentage of them are small investors who have bought a few shares with an idea of safety and profitably employing their surplus capital.

On January 15, 1931, the City of Lethbridge, Alberta, was made a point of call on the air mail route operating between Winnipeg and Calgary. Lethbridge is a point of considerable potential importance as the probable point from which the air line to the Pacific Coast will commence. Official surveys by technical officers of the Canadian Government Civil Aviation Branch have definitely indicated the route from Lethbridge as the most feasible passage of the Rocky Mountains.

Operating on an equal footing with the fastest system in the world, the Canadian Pacific Cable Quotation Service installed by the Canadian Pacific Telegraphs was officially opened with the New Year and places Winnipeg second in house among the world's brokerage centres. Practically perfect operation of upwards of 35 tape ticker machines, carrying their news with lightning speed, beating all previous records by two-thirds, is announced by W. M. Thompson, manager, western lines, Canadian Pacific Telegraphs.

An official report shows that at the end of November last, there were 445,576 licensed radios in Canada or about one for every 22 of the population. Ontario leads with 228,499 sets and Quebec next with 21,833. Toronto leads all Canadian cities with 71,142 sets and in western Canada Vancouver tops the list with 17,219 sets. Winnipeg sets with 15,523. It is only ten years since the first program was broadcast by radio.

Among foodstuffs taken from the sea, the Indians on the coast of British Columbia put seaweed as worth adding to the menu of an epicurean, and in earlier days it was used among them as a remedy also. On the Atlantic Coast of Canada some use has been made of seaweed, in combination with fish oil, in producing fish meal which is a valuable stock food.

What is regarded as one of the principal commercial industries of Canada is the work in carrying on with the cultivation, harvesting and sale of blueberries. The modern methods have been yet applied, it totals hundreds of thousands of pounds in volume of production and there are about 600,000 lbs. in cold storage at the present time. Blueberry pie is a dessert that even Epicurus himself would have snatched his finger for.

Fish caught in the fresh water lakes of Northern Saskatchewan are now shipped by aeroplane to markets in Eastern Canada and the United States. About 3,000 pounds of whitefish and trout are carried from the northern lakes to Prince Albert in two daily trips. It is planned to increase the service so that 6,000 pounds can be transported daily to the railroad.

Wheat Certificates, Again.

The Sun reproduces this week the resolution on wheat certificates printed last week. This resolution was presented at the Edmonton and Peace River Federal constituency convention in Edmonton on Jan. 15, and was up for discussion at the big U. F. convention in Calgary last week, where it carried unanimously. The resolution came originally from Winterburn, sponsored by Geo. Ravington—

WHEREAS, owing to our inability to market our Canadian wheat crop, a situation has arisen which threatens to cripple or destroy the whole business of Canada;

Be it resolved that we request the Federal Government to issue wheat certificates or dollars redeemable in wheat, and desirable in law;

And be it further resolved that we request the Federal Government to over take the 1930 crop, at a price approximating the cost of production, and pay the producer for the same in wheat certificates.

Death of Mr. John Ellis

There passed away Thursday last, Jan. 21, one of the pioneers of Ingo district in the person of Mr. John Ellis. Deceased was in his 87th year, having been born at Providence, Rhode Island, on April 1, 1843.

Mr. Ellis came to western Canada in the fall of 1904, on a land seekers' trip. He returned here the following year, and acquired a half section of land, on which he had resided up to the time of his death.

Deceased had been in remarkably good health up to quite recently, and passed away at his home Thursday last, from heart failure.

The funeral took place on Saturday afternoon last. It was attended by a very large number of friends and acquaintances of deceased, who was widely known and highly respected. Service was held at the house by the Rev G. A. Sander, pastor of the Stony Plain United church. Interment took place at the Ingo cemetery.

He is survived by his wife, Cecelia, and by two sons—Mr. Allen W. Ellis, at home, and Mr. Albert J. Ellis, of Kalspell, Montana.

Used of Thanks.

Mrs. Ellis and Family wish to thank their friends for the kindness shown and expressions of sympathy during their recent bereavement.

Waltham League Officers' Conference.

Sponsored by the district officers of Waltham League, a conference was held at Grace English Lutheran church, in Edmonton, on Friday, Jan. 23d. Thirty-two officers of societies in Edmonton and district attended. All phases of League activities were reported on and discussed.

Rev. Goebel, hospice secretary of the International League, represented the league at large.

A fellowship dinner was held in the rose room at the King Edward hotel. Prof. Baepfer, of Concordia College, acted as toastmaster.

Officers present from Stony were: Mary, Matilda Enders, Anna Miller, Louis Oppertshausen, Rev H. Kitting, Chas. Windel, Ph. Kaduna, W. Roman, V. J. Kulak.

U.F. Membership Increasing

Membership of the U.F.A. organizations, including U.F., U.F.W. and the junior branch totaled 18,105 at Dec. 31st, 1930, as compared with 13,560 the previous year, and is larger at the present time than in any year since 1922, according to figures presented at the convention in Calgary last week.

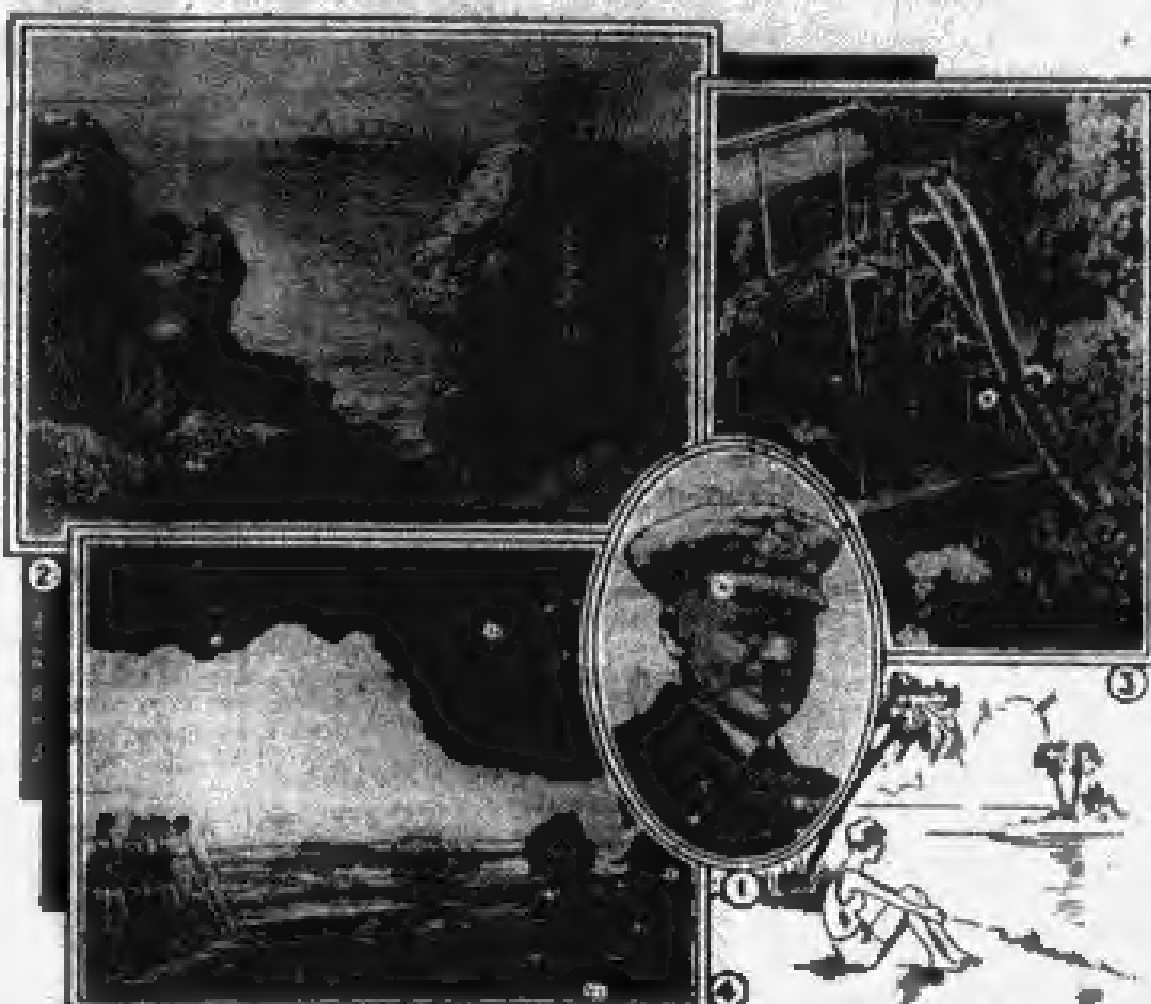

Grain Provides Amusement.

At the Empress theatre, Lethbridge, the management is now allowing farmers of that district to use the show by bringing in wheat, oats or barley, instead of paying in cash. A bushel of wheat is valued at 50c, barley 25c and oats 20c—Market Examiner.

To Bring Bermuda Next Door

Already the winter playground of many Canadians, Bermuda will be brought even closer to Canada by the Immigration, January 31st, of a weekly sailing from New York by the Canadian Pacific liner Duchess of York.

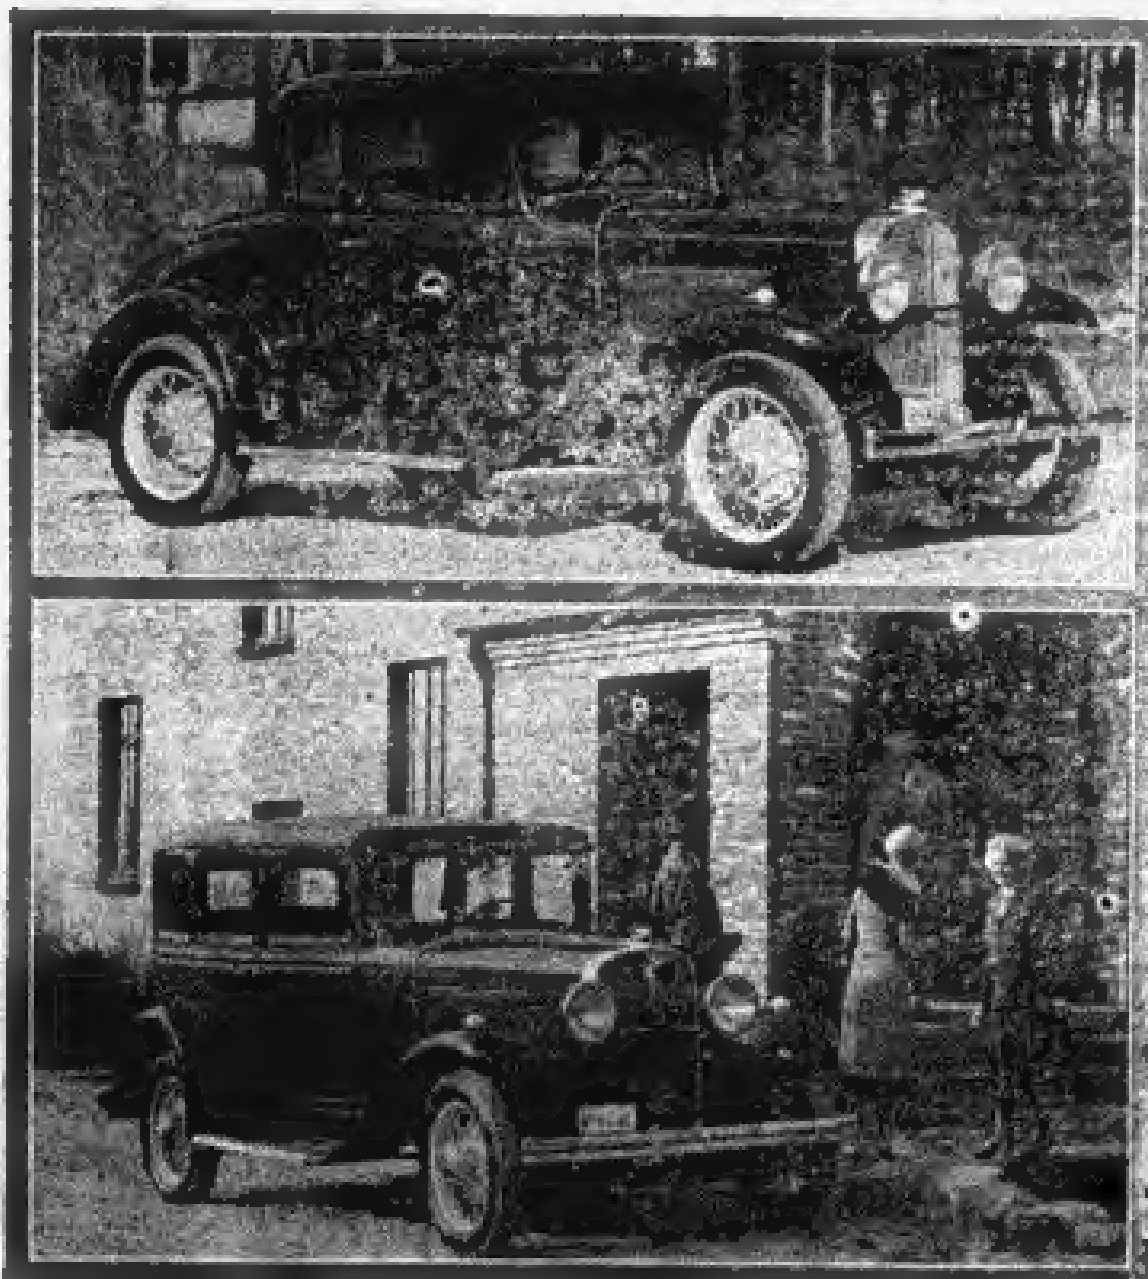

The island—or, to be correct, the 181 small islands that form Bermuda in addition to being the closest summer-weather resort to Canada is famous for lifing, golf and bathing.

Canadian professionals from Toronto and Hamilton are familiar faces at two of the many fine

courses of which Bermuda boasts, and excellent bathing both on beaches and in open-air sea-water pools is a feature.

Featured above are: (1) Captain R. H. Stuart, V.C., D.S.O., commander of the Duchess of York (2) Coral rock formation on the coast showing the Duchess of Bedford en route to the West Indies (3) The open-air swimming pool, which is a feature of the Hotel Hamilton, Bermuda's largest hotel (4) One of the many coves.

Larger 1931 Pontiac Has Many New Features

A wide number of engineering advancements are seen in the improved 1931 Pontiac. The longer wheelbase of 118 inches lends itself to more beautiful body proportions and has permitted the designing of a larger, lower appearing automobile. Above are shown the standard coupe and

four door sedan models. These characteristically display the advanced advances in styling. The chrome-plated screen conceals and protects the radiator core. A curved fender tie-bar supports the chrome-plated head lamps. Added passenger comfort has been at-

tained through the larger, rounder Fisher bodies and a better ventilation development. The whole body of the new car is practically cushioned on rubber. The 1931 Pontiac is being offered for less than the price at which any previous Pontiac was introduced.

Dance, Muir Lake Hall, Friday, January 30.
